FRONT-END DEVELOPMENT
ASSIGNMENT 2

STUDENT NAME: RANJITH M
YEAR: II YEAR
COLLEGE CODE: 201
COLLEGE NAME: Arignar Anna Goverment Arts Collage
DEPARTMENT: Computer Science
SEMESTER: 4th samester
ROLL NO: 24CSC124
NMID: asanm20124132011802521080
DATE: 07/03/2026
TITLE: Front Eand Develoment {Simple Event Registration Page}

PROJECT TITLE:

1. Problem Statement

- The event registration webpage for **AI & Data Science Workshop 2026** was initially developed using basic HTML structure in Assignment-1.

- Although the page contained all necessary elements such as event details, registration form, participant table, and footer, it lacked visual appeal and professional styling. The layout appeared plain, spacing was minimal, and user experience could be improved.

2. Objective

- The objective of this assignment is to apply CSS styling techniques to transform the basic HTML event registration page into a clean, modern, and professional-looking interface.
- The goal is to:
- Enhance visual hierarchy
- Provide better user interaction
- Create a consistent and appealing design theme
- Improve readability and layout structure

---

3. Requirements

3.1 Apply Global Styling

- Global styling was applied to the entire webpage to create a consistent design.
- A gradient background (blue to purple) was applied to give a modern appearance.
- A clean and readable font family was used throughout the page.
- Proper margin and padding were added for spacing.
- Text alignment was adjusted to improve readability.
- A uniform color scheme was maintained across sections.

3.2 Style the Event Title and Description

- ❑ The event title **"AI & Data Science Workshop 2026"** was styled to make it visually prominent.
- ❑ Increased font size for emphasis.
- ❑ Applied white color for contrast against the gradient background.
- ❑ Center alignment for professional presentation.
- ❑ Added spacing below the title for clarity.
- ❑ Styled the subtitle description with lighter font weight and proper spacing.

3.3 Design the Event Information Section

- The **Event Details** section was enhanced for better readability.
- Placed inside a white card layout.
- Added rounded corners and shadow effects.
- Used table borders for structured alignment.
- Applied padding inside table cells.
- Maintained clear separation between rows.
- This improved clarity of information such as Date, Time, Venue, and Organizer.

3.4 Enhance the Registration Form Layout

- The registration form was designed using a card-based layout.
- Added white background with rounded corners.
- Applied padding for comfortable spacing.
- Used box-shadow for depth effect.
- Maintained consistent alignment of labels and input fields.
- Structured the form into logical sections (Personal Details & Academic Details).
- This made the form visually organized and user-friendly.

3.5 Style Fieldsets and Legends

- The **Personal Details** and **Academic Details** sections were styled using fieldsets and legends.
- Added subtle borders around fieldsets.
- Styled legends with background highlight.
- Applied bold text for section headings.
- Added spacing between sections for clarity.
- This improved form segmentation and readability.

3.6 Improve Input Elements

- All form input elements were styled consistently.
- Textboxes and dropdowns were given uniform width.
- Added padding for comfortable typing.
- Applied border radius for smooth appearance.
- Used focus effects (border color change/shadow) for better interaction.
- Styled textarea and file upload fields for consistency.
- Proper spacing was added between radio buttons and labels.
- Styled checkbox alignment in the declaration section.
- These improvements enhanced usability and accessibility.

3.7 Button Styling

- The **Submit** and **Reset** buttons were designed attractively.
- Used green color for Submit (positive action).
- Used red color for Reset (clear action).
- Added padding and rounded corners.
- Applied hover effects with smooth transitions.
- Center-aligned buttons for balanced layout.

3.8 Style the Participants Table

- ❑ The **Registered Participants (Sample)** table was enhanced.
- ❑ Added borders around table cells.
- ❑ Styled header row with purple background.
- ❑ Applied white text for contrast.
- ❑ Added alternate row background styling.
- ❑ Included hover effect for better interactivity.
- ❑ Improved padding for readability.
- ❑ This made the table structured and easy to read.

3.9 Style the Declaration Section

- ❑ The declaration checkbox section was properly aligned.
- ❑ Added spacing between text and checkbox.
- ❑ Positioned checkbox neatly beside the declaration statement.
- ❑ Ensured visual balance within the form layout.
- ❑ This improved clarity and professional appearance.

5. Implementation Steps

- Created a separate CSS file and linked it to the HTML page.
- Applied global styles (body, fonts, background).
- Styled the header section (title and description).
- Designed card layouts for event details and registration form.
- Styled fieldsets and legends.
- Applied consistent styling to all form input elements.
- Designed interactive buttons with hover effects.
- Styled the participants table with structured formatting.
- Designed and aligned the declaration section.
- Styled the footer with proper background and alignment.
- Tested the webpage in browser and adjusted spacing and responsiveness.

3.10 Footer Design

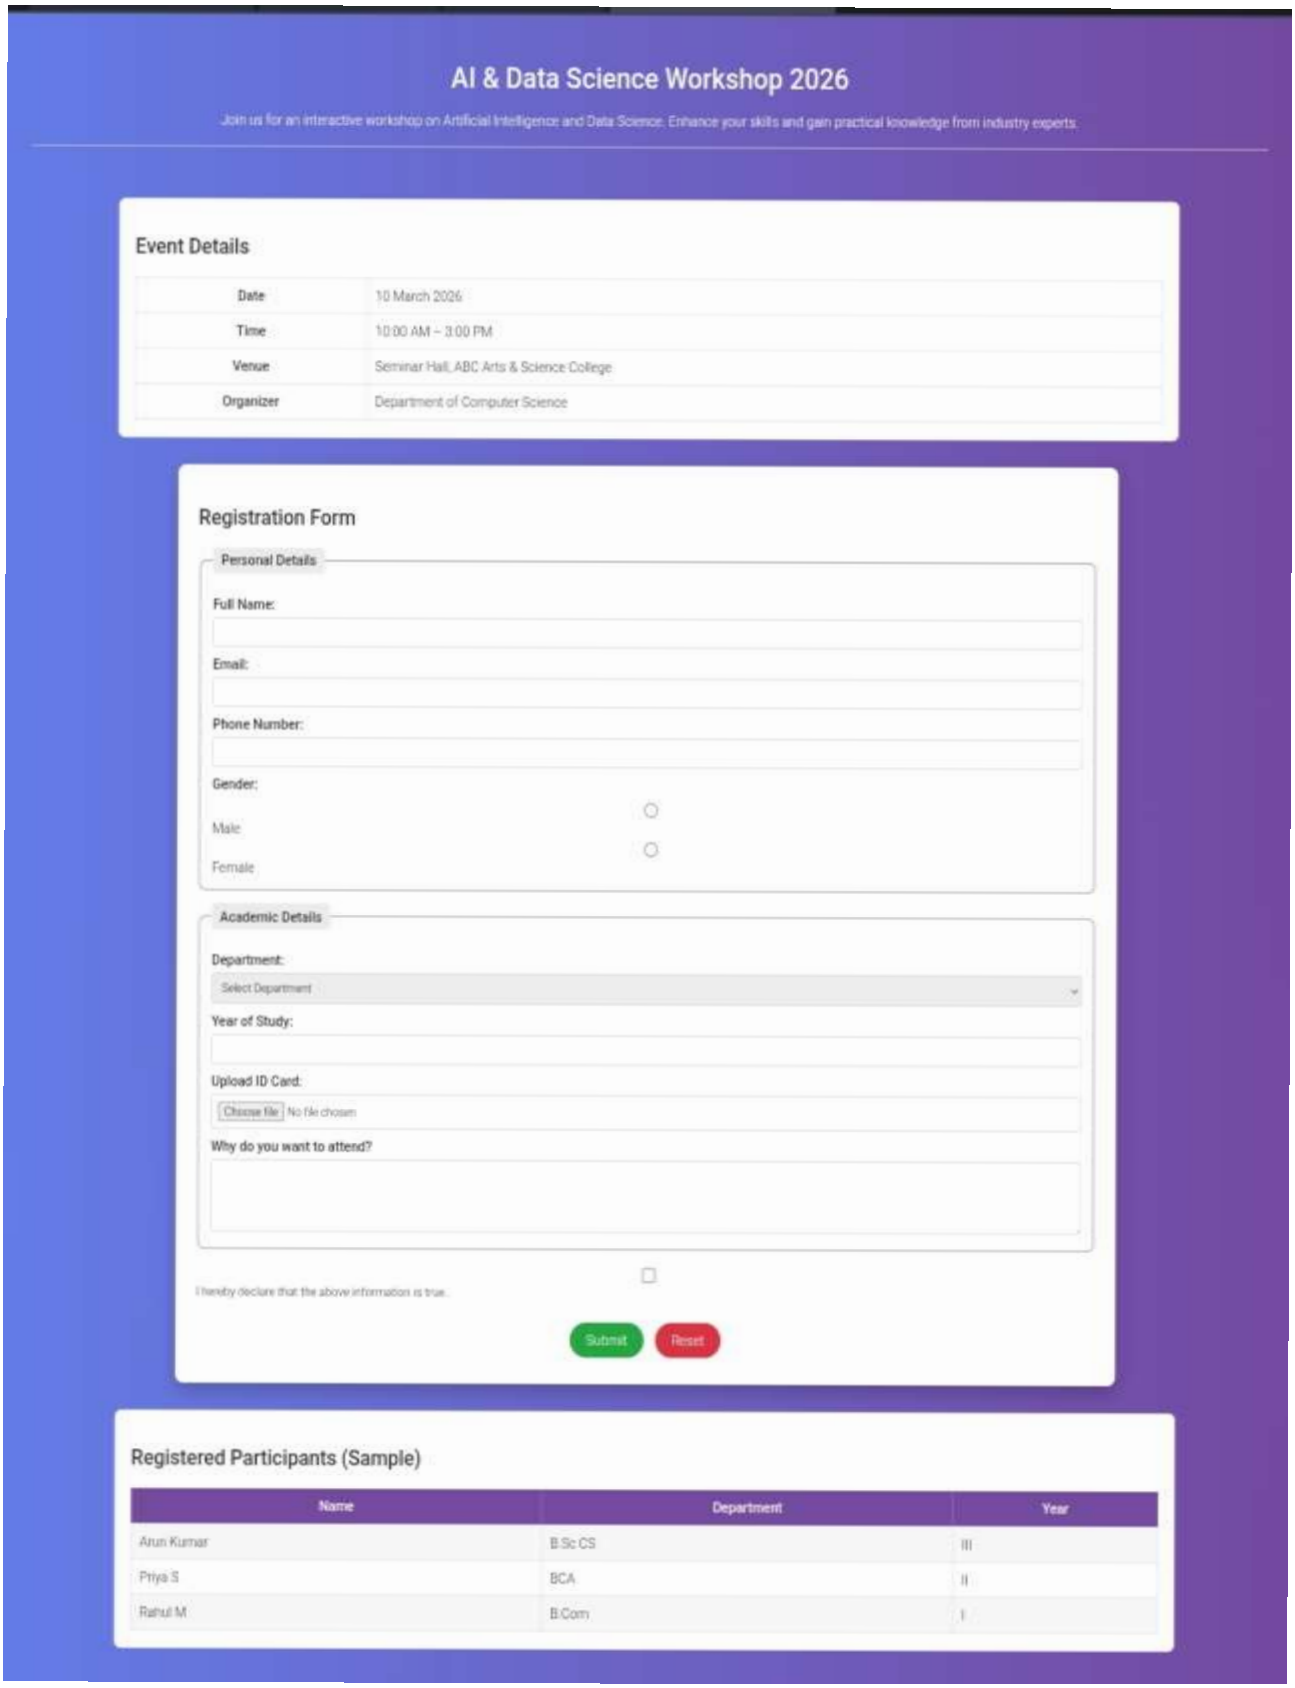
- The footer section was styled for clear visibility.
- Applied dark background color.
- Center-aligned text.
- Added padding for spacing.
- Used light-colored text for contrast.
- Clearly displayed contact email and help desk number.
- Included copyright information.
- This provided a clean and professional closing section

---

4. CSS Concepts Used

- The following CSS concepts were applied in this project:
- CSS Selectors (element, class, id)
- Box Model (margin, padding, border)
- Background colors and gradients
- Typography (font size, weight, alignment)
- Border-radius
- Box-shadow
- Hover effects and transitions
- Table styling
- Form styling
- Flexbox (for alignment where required)
- Pseudo-classes (:hover, :focus)

6. Output:



AI & Data Science Workshop 2026
Join us for an interactive workshop on Artificial Intelligence and Data Science. Enhance your skills and gain practical knowledge from industry experts.

7. Learning Outcome

- Through this project, the following skills were developed:
- Understanding of CSS styling techniques.
- Practical knowledge of layout design.
- Improved understanding of spacing and alignment.
- Experience in using the CSS box model.
- Application of hover and focus effects.
- Designing responsive and user-friendly forms.
- Enhancing visual hierarchy and presentation.

---

8. Conclusion

- The basic HTML event registration page was successfully transformed into a modern and professional webpage using CSS styling techniques.
- The improved layout, structured design, interactive elements, and clean visual presentation significantly enhanced user experience. This project demonstrated how CSS plays a vital role in improving the appearance and usability of web applications.
